### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**24Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24,25,27,28,50-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Kikawada et al. (5,447,149).

With respect to claims 24,50 Kikawada et al disclose a flexible arm (FIG.3) for holding medical instrument (F') comprising a plurality of links (10'), each having a hole therethrough, an elongate element (15) extending through the holes, wherein tensioning the elongate element locks the plurality of links in fixed orientation; as set forth in column 3, lines 1-40; a base link (J) having a proximal end and a distal end, and being aligned with the body on the proximal end along a first axis and being aligned with one the plurality of links on the distal end along a second axis, wherein the second axis forms an angle with the first axis of between 45 and 90 degrees; as best seen in FIG.3., a body (G).

With respect to claims 25,27,51,52, Kikawada et al disclose all the limitations, as best seen in FIG.3, and as set forth in column 2, lines 45-68, column 3, lines 1-40.

**Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kikawada et al. (5,447,149) in view of Farascioni (5,976,080).

With respect to claim 26, it is noted that Kikawada et al did not teach of a spring biasing the actuator toward the first position; as claimed by applicant. However, in a similar art, Faracioni evidences the use of a spring bias actuator to permit relative articulation of the link members.

Therefore, given the teaching of Faracioni, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of kikawada et al., as taught by Faracioni to permit relative articulation of the link members.

#### ***Response to Amendment***

Applicant's arguments with respect to claims 24-28, 50-52, have been considered but are moot in view of the new ground(s) of rejection.

#### ***Allowable Subject Matter***

Claims 20-23, 49 are allowed.

#### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
